

WHY DID I GET VACCINATED?

“TO PROTECT OUR BABY BOY.”

CELESTE M. OF ROYAL OAK, MICHIGAN

The COVID-19 vaccine is safe for pregnant women.

Being 24 weeks pregnant, Celeste wondered if she should get the vaccine or wait until after her baby was born. After talking to multiple doctors and learning that pregnant women are at higher risk of severe illness from COVID-19, she decided the vaccine was the best way to protect herself and her baby. She looks forward to the day soon when all her relatives will be vaccinated and can safely gather together to meet the newest addition to the family.

The vaccines have been tested for safety and are trusted by doctors. Let's end the pandemic. Find a vaccine near you at Michigan.gov/COVIDvaccine.
